Education

LODZ UNIVERSITY OF
TECHNOLOGY 2013-2018

- Bachelor's Degree,
Mechatronics

Language

- Ukrainian - native
- Polish - C1
- English- B1/B2(technical
communication)
- Russian- C1

Profile

Experienced .NET developer with over 8 years of experience in creating, developing and optimizing web applications and microservices. As a technology leader, I actively shape system architecture, streamline team processes and implement modern CI/CD practices. I combine technical competences with the ability to plan team tasks in the technical area, mentoring and effective communication with business stakeholders. I have experience in designing large-scale solutions, system integrations and automation of development environments using Docker/Kubernetes. Focused on quality, efficiency and technological development.

Work experience

- **Rossmann SDP, Lodz** 2017.08 - present
Senior developer(.NET Software Developer/Angular)
 - Design and implementation of web applications and microservices (end-to-end: backend + frontend)
 - Creating new systems from scratch, including application architecture and integration design
 - Optimizing critical processes and code for performance
 - Implementations based on Docker, Kubernetes, CI/CD, Azure DevOps
 - Mentoring, code review, implementing technological changes
 - Cooperation with business and analytical teams

Skills

- Backend: C#, .NET 6/8, ASP.NET Core, Web API, REST API, EF Core, T-SQL, MongoDB, Oracle Database
- Frontend: Angular, TypeScript, Material UI, Razor, DevExtreme, DevExpress, Bootstrap, HTML, CSS
- DevOps: Docker, Kubernetes, Azure DevOps, CI/CD, PowerShell, YAML
- Other: GIT, Redis, TFS, DevExtreme, SonarQube, Confluence, TFS, BigQuery, BlueOptima

Courses

- Domain-driven design (2025)
- Kubernetes: container orchestration (2023)
- MongoDB database administration (2023)
- Angular in Space (2023)
- Advanced C# programming (2022)
